

Ravindrakumar M. Suthar

Assistant Vice President • Senior Frontend Architect • Engineering Leader

Location: Pune, Maharashtra, India | Phone: +91 83800 99988 | Email: ravindra.suthar@me.com

LinkedIn: linkedin.com/in/ravindrasuthar | Profile & Portfolio: <https://ravindra.lets.gen.in/>

PROFESSIONAL SUMMARY

Product Engineering Leader and Senior Frontend Architect with **17+ years of experience** designing resilient, enterprise-scale web platforms for global BFSI clients. Proven record of leading multi-team engineering organizations, driving **Workday platform uploads and HRIS integrations**, modernizing legacy systems into zero-downtime micro-frontends, and establishing enterprise accessibility (WCAG 2.1/2.2 AA, ADA, Section 508) and client-side security practices.

Deep expertise across **React, Next.js, TypeScript, JavaScript ES6+, micro-frontend architectures, web performance (Core Web Vitals), and generative AI developer workflows (Devin AI, GitHub Copilot)**. Experienced in translating complex technical roadmaps into executive narratives, managing risk, forecasting budgets, and cultivating high-retention engineering cultures (<8% attrition).

TECHNICAL SKILLS & COMPETENCIES

Frontend Architecture: Micro-frontends, Reference Architecture, UI SDK Development, npm & Yarn Workspaces, System Design, UI Platforms, API and Iframe Integration, postMessage Protocols, Core Web Vitals, Bundle Optimization.

Core Technologies: React, Next.js, TypeScript, JavaScript (ES6+), Redux, Zustand, Tailwind CSS, Vanilla CSS, SCSS, LESS, Vite, Webpack, Babel, Cypress, React Testing Library.

Engineering Leadership: Agile & Scrum Leadership, Certified ScrumMaster (CSM), SDLC Optimization, Workday Platform Uploads, Budget Management, Capacity Planning, Talent Acquisition, Coaching & Mentorship.

Accessibility & Security: WCAG 2.1 / 2.2 AA, Section 508, ADA Compliance, axe-core, Lighthouse CI, NVDA Audits, Content Security Policy (CSP), OWASP Top 10, DOM Runtime Integrity (StateGuard.js).

AI & Developer Productivity: RAG (Retrieval-Augmented Generation), Non-AEM to AEM Migration AI Agent & Integrated VS Code Extension, Enterprise Prompt Engineering, AST Transformation Scripts, Devin AI Autonomous Agents, GitHub Copilot, Claude, OpenAI APIs, Google Antigravity SDK, LangChain, Automated Test Scaffolding.

Cloud & DevOps: Cloudflare Pages & Workers, GitHub Actions, GitHub Advanced Security, Dependabot, Docker, Kubernetes, Adobe Experience Manager (AEM / CQ5), Workday HRIS.

PROFESSIONAL EXPERIENCE

Assistant Vice President — Frontend Architecture & Engineering Leadership

May 2013 – Present

Citicorp Services India Pvt. Ltd.

Pune, India

- **Led legacy BFSI platform migration** to Micro-frontend architectures across multi-team squads, ensuring 100% business continuity throughout the multi-phase rollout.
- **Architected Autonomous Non-AEM to AEM Migration AI Agent & Integrated VS Code Extension:** Engineered a unified developer productivity platform where an autonomous AI migration agent operates directly within a custom VS Code extension — combining Retrieval-Augmented Generation (RAG), automated prompt engineering templates, and custom AST parsing scripts to migrate legacy non-AEM component trees into idiomatic Adobe Experience Manager (AEM) Core Components, HTL templates, and Sling models, slashing migration cycle times by over 60%.
- **Facilitated Workday platform uploads** and HRIS configuration workflows, validating data integrity at enterprise scale with zero business disruption.
- **Architected enterprise UI, API, and iframe integrations** across multiple distributed platforms, cutting integration complexity by 40% and accelerating feature time-to-market.
- **Delivered up to 50% application load-time improvements** via React, Next.js, TypeScript, route-based code splitting, and automated Core Web Vitals telemetry.
- **Pioneered Devin AI and GitHub Copilot adoption** across squads, saving ~35% developer effort on boilerplate and test scaffolding while accelerating PR review velocity by 40%.
- **Established enterprise-wide Section 508 and ADA compliance programme**, integrating axe-core and Lighthouse CI into GitHub Actions alongside NVDA audits, reducing post-deployment remediation spend by 60%.
- **Engineered GitHub-first DevOps pipelines** using GitHub Actions, Advanced Security scanning, Dependabot auto-patching, and GitHub Projects for Agile delivery.
- **Managed End-of-Vendor-Support (EOVS/EOL) transitions** with zero business disruption through strategic migration roadmaps and coordinated cross-functional stakeholder alignments.
- **Maintained team attrition below 8%** across engineering squads through structured 1-on-1s, technical skill ladders, and internal Communities of Practice.

Senior Interactive Developer

March 2013 – May 2013

Sapient

Bangalore, India

- Engineered high-performance responsive UI components for retail clients utilizing HTML5, CSS3, and Adobe Experience Manager (AEM / CQ5).

Senior Consultant — CRM UI Architecture

December 2010 – February 2013

Cognizant Technology Solutions

Hyderabad, India

- Architected mobile CRM frontends with Siebel CRM targeting Google Chrome and enterprise tablets, boosting field-force productivity.
- Developed Oracle CRM API SOAP integrations and led usability testing and heuristic evaluations.

Module Lead — UI Development

June 2007 – December 2010

Impetus Infotech India Pvt. Ltd.

India

- Led UI engineering pods for enterprise web applications, collaborating closely with senior leadership to govern UI standards and usability lifecycles.

Lead Web Specialist

August 2004 – June 2007

Gatesix Technologies India Pvt. Ltd.

India

- Defined design systems, development standards, SEO architecture, and W3C web compliance.

Senior Web Designer

May 2003 – July 2004

Pinnacle Technosys

India

- Designed and launched compliant web interfaces while conducting R&D on emerging client-side web technologies.

FEATURED TECHNICAL INNOVATIONS & OPEN SYSTEMS

StateGuard.js: Specialized browser runtime JavaScript utility that protects DOM attributes from tampering via browser developer tools. Engineered for client-side state integrity in mission-critical BFSI transactional workflows (rmsuthar.github.io/StateGuard).

Global Edge Sandbox & Multi-Region Load Balancer Inspector: Edge proxy platform built on Cloudflare Workers simulating web access across 12 global PoPs with framebuster neutralization, biometric WebAuthn security, and WCAG AAA theme system (gateway.lets.gen.in).

EDUCATION

Post Graduate Diploma in Information Technology

1999 – 2001

Sikkim Manipal University

India

Higher Diploma in Software Engineering (HDSE)

Aptech Computer Education

1999 – 2001

India

Bachelor of Science (B.Sc.) in Chemistry & Mathematics

Gujarat University

1996 – 1999

India

CERTIFICATIONS & CREDENTIALS

- **Certified ScrumMaster (CSM)** — Scrum Alliance
- **AWS Cloud Practitioner** — Amazon Web Services
- **IBM Design Thinking Practitioner** — IBM
- **Google Analytics Certified** — Google
